

Serveur

Socket 1

Réseau

Socket 2

Client

Canal de  
communication

The diagram illustrates a communication channel between a 'Serveur' (Server) and a 'Client'. The server is represented by a yellow rounded rectangle on the left, and the client is a yellow rounded rectangle on the right. A horizontal blue bar connects them, divided into three sections: 'Socket 1' on the left, 'Réseau' (Network) in the center, and 'Socket 2' on the right. The 'Réseau' section is highlighted with a white starburst shape. A black bracket underneath the entire blue bar is labeled 'Canal de communication' (Communication channel).
